Dear Valued Customer,

It goes without saying that these are challenging times for our industry as well as our nation. Much has changed over the last eighteen months, and today we are facing one of the most difficult business environments many of us have ever witnessed. We have seen drastic job cuts made by our competitors and a multitude of equipment sent to auction. Power Equipment Company has been in business since 1936 (73 years), and we want you to know we plan to be around another 73. We have cut costs and become more efficient, but we refuse to alter our core business philosophy of dedicating ourselves to our customers. Power Equipment Company will continue providing you the support you have come to expect from us.

A cornerstone value resulting in our longevity has been our commitment to product support. This pledge is evident now more than ever with the retention of more than 80% of our service technicians even with the economy down drastically. While we have not been able to escape this downturn completely unscathed, we undeniably know that without superior product support we would be doing a disservice to our customers and ourselves.

Our service technicians are the best of the best as evidenced by an average of over 20 years of industry experience with expertise ranging across all product lines and brands. Power Equipment Company realizes the importance of continuity when it comes to our product support offerings, and we are committed to delivering the excellence you deserve and expect.

Power Equipment Company wants to earn your business now and in the future. We are confident that our commitment to providing superior service and parts availability and support will secure business from our current customers as well as prospective customers. Keeping our talented and knowledgeable team intact and performing at their best is our goal! Let us prove to you that you can rely on Power Equipment Company for all of your product support and parts needs. We specialize in all makes and models of equipment and are dedicated to supporting your equipment in order to minimize your downtime and maximize your cost per hour effectiveness.
